EXPERIENCE

- **Banque de Tunisie et des Émirats (BTE), Tunisia** *Feb 2026 – Present*
 - Designed and deployed a fully autonomous outbound agent that replaces a manual debt-collection workflow end-to-end: calls debtors, authenticates against EspoCRM, negotiates payment terms, and logs outcomes with zero human agent involvement.
 - Orchestrated a real-time multi-stage automation pipeline (FreeSWITCH SIP/RTP → FastAPI WebSocket gateway → VAD → STT → NLU/RAG/LLM → TTS) achieving 1.05 s end-to-end latency.
 - Automated dialogue decisioning with a hybrid rules+ML system (Rasa NLU + RAG + LLM fallback), reducing dependency on hard-coded logic while maintaining 98.1% intent accuracy across 39 intents.
 - Built a governance portal automating campaign management, analytics, and guardrail enforcement across 12 self-hosted Docker/systemd services, removing manual monitoring overhead.
- **Inetum, Tunisia** *Jul 2025 – Sept 2025*
 - Built an AI agent automating Sage X3 ERP support workflows: autonomous SQL query generation and CSV manipulation to replace manual data lookup and reporting tasks.
 - Developed a TypeScript-based mobile automation layer providing streamlined, no-manual-step ERP access on mobile devices.
- **MyAI Pathways, Remote (USA)** *Oct 2025 – Dec 2025*
 - Developing an AI model readiness assessment tool for businesses using LangChain and Next.js, enabling companies to evaluate AI integration potential.
- **MEDIANET, Tunisia** *Feb 2023 – Jun 2023*
 - Established a fully automated CI/CD pipeline with GitHub Actions, cutting deployment time by 90% (manual to automated release process).
 - Led development of a MERN & Flutter-based reward system with real-time notifications and gamification.
 - Designed a user analytics dashboard using Chart.js and MongoDB aggregations.

KEY PROJECTS

- **Exaq OCR Assistant:** Automated document data entry via a YOLOv13 + TrOCR pipeline, achieving 97% accuracy and cutting manual entry time by 85%.
- **RAG AI Resume Matcher & Skill Coach:** Automated end-to-end candidate evaluation — resume parsing, skill grading, and learning-path generation — via LangChain-orchestrated chains.
- **MLOps Pipeline:** Automated experiment tracking, model versioning, and containerized deployment (MLflow, DVC, Docker) to remove manual ML-ops steps.
- **LABLAB.AI Hackathon: Language Learning Platform:** Developed a GPT-4-powered platform using Flask, MongoDB, and Docker for language proficiency.
- **Emotion Recognition:** Built an audio classification pipeline with MFCC extraction and LSTM models to detect emotions in voice data.

EDUCATION

- **ESPRIT, Tunisia** – Data Science Engineering (Final Year) *2023 – 2026*
- **ISTIC, Tunisia** – Research MSc in Robotics *2023 – 2025*
- **ISTIC, Tunisia** – BSc Software Engineering *2022 – 2023*
- **Lycée Ibnou Rachik** – Baccalaureate in Technical Sciences *2020*

SKILLS & CERTIFICATIONS

Skills:

AI/Automation: LangChain, Rasa, HuggingFace Transformers, Whisper, ChromaDB, FAISS

DevOps/Automation: Docker, GitHub Actions, CI/CD, DVC, Nginx

Programming Languages: Python, JavaScript (Node.js), SQL, Bash

Databases: MongoDB, MySQL, SQLite

Certifications:

Cisco AI Fundamentals, NVIDIA LLMs, Datacamp ML/AI Stack

Languages:

Arabic, French, English
