EXPERIENCE

- **Banque de Tunisie et des Émirats (BTE), Tunisia** *Feb 2026 – Present*
 - Designed and built an on-premises automated outbound voice agent (final-year engineering project) that calls debtors, authenticates them against EspoCRM, negotiates payment, and logs the outcome with no human agent.
 - Engineered the real-time voice pipeline with FreeSWITCH (SIP/RTP), a FastAPI WebSocket gateway, Silero VAD V5, fine-tuned int8 faster-Whisper, and Piper TTS, reaching 1.05 s end-to-end latency (3.20 s on novel queries).
 - Built the dialogue and reasoning layer with Rasa 3.6 (98.1% F1 across 39 intents, 3,704 test examples), ChromaDB + bge-m3 RAG over policy documents, a Cerebras LLM fallback, and DistilBERT multilingual distress detection.
 - Delivered a Django/Next.js governance portal (analytics, guardrails, campaign management) over 12 Docker/systemd services, validated by 69 dialogue story tests, a 65-case adversarial payment suite, and 135/138 deployment checks.
- **MyAI Pathways, Remote (USA)** *Oct 2025 – Dec 2025*
 - Developing an AI model readiness assessment tool for businesses using LangChain and Next.js, enabling companies to evaluate AI integration potential.
- **Inetum, Tunisia** *Jul 2025 – Sept 2025*
 - Developed a TypeScript-based mobile solution for Sage X3 to enable seamless ERP access.
 - Built an AI agent for Sage X3 support, leveraging SQL query execution and CSV manipulation for efficient data processing.
- **MEDIANET, Tunisia** *Feb 2023 – Jun 2023*
 - Led development of a MERN & Flutter-based reward system with real-time notifications and gamification.
 - Designed a user analytics dashboard using Chart.js and MongoDB aggregations.
 - Established a CI/CD pipeline with GitHub Actions, reducing deployment time by 90%.

KEY PROJECTS

- **RAG AI Resume Matcher & Skill Coach:** Designed a resume matcher, skill grader, and course recommender using LangChain, FastAPI, and Flask to provide personalized job matching and learning paths.
- **Exaq OCR Assistant:** Built an intelligent document processor with YOLOv13 and TrOCR, achieving 97% accuracy on handwritten and printed text, reducing data entry time by 85%.
- **LABLAB.AI Hackathon: Language Learning Platform:** Developed a GPT-4-powered platform using Flask, MongoDB, and Docker for language proficiency.
- **E-Commerce Site (Angular/PHP):** Created a full-stack solution with JWT authentication, dynamic dashboards, and inventory management.
- **Emotion Recognition:** Built an audio classification pipeline with MFCC extraction and LSTM models to detect emotions in voice data.
- **MLOps Pipeline:** Implemented experiment tracking with MLflow, model versioning via DVC, and containerized deployments with Docker.

EDUCATION

- **ESPRIT, Tunisia** – Data Science Engineering (Final Year) *2023 – 2026*
- **ISTIC, Tunisia** – Research MSc in Robotics *2023 – 2025*
- **ISTIC, Tunisia** – BSc Software Engineering *2022 – 2023*
- **Lycée Ibnou Rachik** – Baccalaureate in Technical Sciences *2020*

SKILLS & CERTIFICATIONS

Skills:

Programming Languages: JavaScript (Node.js, React, Angular), Python, PHP, SQL, Bash

Frameworks/Libraries: React, Angular, Flutter, Flask, Django, Express, Laravel, Tailwind CSS, Next.js, FastAPI

Machine Learning/AI: TensorFlow, Scikit-learn, YOLO, HuggingFace Transformers, MLflow, FAISS, LangChain, Rasa, Whisper, ChromaDB

DevOps: Docker, GitHub Actions, CI/CD, Nginx, DVC

Databases: MongoDB, MySQL, SQLite

Certifications:

Cisco AI Fundamentals, NVIDIA LLMs, Datacamp ML/AI Stack

Languages:

Arabic, French, English
